Subject: BA Halloween props

This is worth a recount.

House decorations were:

- waist-high rack cabinet on sofa in LR window with motorcycle helmet on top & works covered by sheet. A very convincing huge ghost from few feet out in yard.
- elevated 1949 Admiral 12x12 TV\* playing in front of it & visible fm street. In fact watched King OT Hill on it. Ran 4 no-glitch hours & filled LR with "old TV smell" reported one 60-ish observer.
- LR interior dimly lit by throttled-back torchier lamp. Note it's triac never got into TV's video.
- 50s A&M Haloween sound-effects LP playing thru KLH-24 w. L channel running thru PA trumpet outside in tree.

Lotsa Nestles candy left over & would gladly trade batch for

- o mechanical filters
- o 4CX1500s
- o RE S-line
- o etc

\*will be FS @ Lawrenceville, GA hamfest Saturday

The right way to answer this for yourself is to buy a copy of Ludwell =  
Sibley's book TUBE LORE. You will find that there's quite a few tube =  
types that don't use the standard numbering system. And you will have =  
the ability to look up almost any tube and find out its history and =  
where it fits into the various manufacturers numbering schemes, plus =  
date coding translation and lots more interesting stuff. So I say--get =  
the book.

Subject: tube numbering systems and the 2E26

Hi, Gang

I've been pondering a long time: why do a few tubes have  
a numbering system unlike the rest?

For instance: the 2E26 has a 6.3v heater, so why does the number  
begin with a "2"? Likewise, the 4D32 doesn't have a 4 volt heater.

73,

Ed k4pf@juno.com

By any chance is anyone running an HF amp or transmitter with push-pull =  
304TL tubes in the final? I have this homebrew here that uses this =  
configuration. But the power supply it came with is in pieces and it is =  
a mess. It was modified many times over the years by the builder and has =  
been patched more than a Microsoft software product.

So this thing needs a filament, screen and HV supplies. I can use some =  
of the original parts. But for the HV, I don't want to use the original =  
design because it is built around a 230V pole pig transformer and has =  
lots of quirky design anomalies that I can live without (Anbody need a =  
125 pound pole pig? It'll give you 1700 to 2200 volts all day. The only =  
drawbacks are that it is huge and weighs a ton).

So I'd like to cheat and see how someone else is powering their rig to =  
get some ideas. References to complete designs in any of the popular =  
literature would be useful too. Can anyone help?

Hi there

I am a WWII reenactor doing a Signal Corp impression. I have a BC-654-A and the dynmotor that powered it, however I do not have the power cord (CD-105 I believe) which connects the two.

Also looking for correct rod antenna for the above.

Can you help?

Thank you

Y'all,

Well it looks like I'll have an 80 meter Novice Band crystal, thanks guys=  
. Now I need a 1930's crystal oscillator circuit. My 1938 ARRL Handbook=  
is missing pages 159 through 162, the heart of the section on a 6L6 Tri-=  
Tet Oscillator. Would someone please make me a copy of those pages or a =  
similar section from another source? I need at least the schematic with =  
the component values.

Thanks a lot,

Jim Hanlon, W8KGI  
PO Box 581  
Sandia Park, NM 87047-0581

This is a correction to my original post.

I still have R-39XX and other parts for sale.

KC/MC Knobs new CNC machined out of 6061 aluminum and powder coated  
\$30.00 ea. For all R39XX including R-391.

Large clamps new made out of 6061 with screw, nut & washer  
7.00 ea. for  
KC/Mc knobs

Locking pins for R-391 and ARR-15 long & short. new 15.00 ea.

R390/391 new green gears made out of stainless 45.00 ea.

Oldham couplers disk with 3 springs new stainless 12.00 ea.

Tags for all R39XX contracts plus other with S/N

of YOUR choice/ R 274, SP 600 freq. plates, EFJ Desk,  
RACAL 2274, CV/591/1722/1728, 391 channel plates & R-388 27.00 ea.  
51J? plus S/N, Caution, LS-206 and others

Meter gaskets new die cut rubber 2 for \$1.00 with any order

75A-4 audio mod plate 6.00 ea.

R39XX top and bottom covers. New gold alodined \$55.00 set or 30.00 ea.

I am having covers made for R-388 price ???? TBD.

R-390A Utah RF deck cover plate new alodined/silk screened 15.00 ea.

R-390/391 RF deck covers alodined and silk screened 30.00 ea.

R39XX 15 small knobs stripped, powder coated and 13 filled 70.00 set

SX-88 new panels powder coated & silk screened 330.00 ea.

SX-88 new bezels CNC 6061 aluminum and powder coated 250.00 ea.  
Have 2 panels and 2 bezels left.

R39XX panels stripped powder coated, silk screened, filled Check for \$\$

32V-3 & KWS-1 panels re-finished Check for pricing.

Cabinets stripped and powder coated Check for pricing

Any welding, hole plugging surface finishing etc to be determined

All items are plus shipping USPS Priority mail with confirmation in most cases.

Payment Hams with current address in QRZ.com personal checks Prefer  
USPS money orders. If Pay Pal please add 2.5% as the above prices are  
fairly tight.

Please mail payments to my shop address:

A friend of mine, K3QDW, has the following Heathkit items for sale. If interested in purchasing, or to obtain more information, contact him directly at hwilcke@netcarrier.com.

HW101 Transceiver, with speaker, and HDP-21A microphone, and HP-23A Power Supply.

HM-15 Reflected Power Meter and SWR bridge

HD-10 Electronic Keyer

IM-11 VTVM

IM-17 Voltmeter

All with manuals.

He says equipment has been in storage, and was working well when placed

in storage.

Made in the early 1950's. When I visit there (not often) it is good to =  
joke with Phil and the crew about the many "discoveries" I would make =  
while climbing over the racks of goodies eg. Brand new 19 sets, a whole =  
box (1 only!) of TBY antenna kits, complete mock-ups of ADF's, complete =  
TBX's etc...

....from downtown Lima to Eureka street to back downtown...they are =  
still going.

The prices and goods have changed.....the family are still great!!

P.S. for those wondering how this ex-limey got mixed up with =  
them...started buying from 'em when I was in England and continued the =  
relationship ever since!

God Bless 'em.....Phil...keep up the great work!!=20

Message-ID: <OE159NQsxA6ieCEL6iW0002347d@hotmail.com>

Yo Tony - what kind of ballast were you importing into the Kingdom?  
You must have had some surplus stores there too - but maybe not as  
crazy as some of those here?

( John Nelson: "There was this big long greasy table, and on it you'd see  
an upside down RBC, a TCS on its side, some huge greasy gears, whatever  
they had carried out and however they plopped it down on the table. Next  
to the wooden table was a dentist chair, for sale too...."

Ray Kresek: "So he put looked at me and said, 'You still want THAT tube,  
hunh?',  
clearly exasperated at me nagging him about selling it, and very suspicious  
that the  
tube had precious metals inside. 'Well....' He reached over and picked up a  
long  
heavy wrench, swung it, and smashed the big bulb to pieces...."

Bob Williams: "So you'd go into the office of the motel, and tell the  
manager  
what you wanted. Aircraft stuff, command sets, TCS's, army gear, and he'd  
give you the key to the room that had that stuff. He trusted you to pick out  
what you wanted and take it up to the office to pay." )

Sri - i have big nostalgia for badly lighted, badly furnished, chaotic  
surplus stores.  
Jeez, i think i should maybe write an article for Radio Bygones. Do the  
blokes  
know what they missed?  
Hue Miller

One could challenge me on this, but can VHS be around for much longer? I=

have a bunch of 16mm films of BA interest, some of which has been transcribed to VHS. I also have a bunch of stuff only on VHS. I'm wondering what digital formats people on the list are using, how much computer it takes to use them, and how happy you are with them.

I want to transcribe both films and VHS stuff to digital so I can share.

Examples:

WW2 Navy Radio Tech. Training Film on Shop Work(drafting, marking, cutting, bending a 1-tube regen receiver chassis)

1924 Felix the Cat cartoon: "Felix Gets Broadcasted"

Hey Rob K2WI

NPR's "All things considered" did a sketch on recording industry sometime in last month. Couple of audio installments.

On statement was "only recording media for the ages is the 78RPM bakelite disk."

I know this doesn't help, but then... unforeseeable compression techniques?

Like who wudda thot I'd find a WS19 w. most tubes, the dyno supply, & the

web-sluch rack @ the end of a hamfest - for \$15 awreddy??? Ruff but useable. Have never seen dyno-supply

Then there was that Thordarson T-21P85 apparrent "CHT style 250w" mod xfrmr that got scooped for \$5? Same time. 'Apparrent' cause one connection set says 'P B+ P' & other '0+/- L0 HI.' (lo for screen thru LRC arrangement?)

Sorry for this improbable recording -> hamfest luck segue.

Subject: Stancor Transformer Question  
Mime-Version: 1.0  
Content-Type: text/plain; charset="us-ascii"; format=flowed

Hi Gang,  
I've started sorting through my junk box (to be truthful, it's a junk room, Actually, it's two rooms, plus my wife's laundry room and part of the garage..) in hopes of getting rid of stuff I'll never use. I started with my transformer shelves, and came across a nice Stancor P8042, that I believe powerd a homebrew 150W AM rig, decases ago. Anybody know the specs on it? There was a matching Stancor 8H choke with it.

Groups,

I have several TCS antenna loading coil units for sale now that I've decided what I want to keep. There are two CML-47205 marked for TCS-15 and a COL-47205 marked TCS-9. Decent black finish condition, a few scratches, and a CWS-27205 marked TCS-8 with gray front panel (black case). \$35 each plus shipping.

Hi everyone This Wednesday November 6th is the next First Wednesday  
CCA AM night on 3880 kcs.

Join us for some outstanding AM signals!

REMEMBER you DO NOT have to be running Collins gear to check in.  
Everything is welcome!

We will have 4 main ncs. One on the East coast, Midwest, Mountain area,  
and West coast. The main ncs will have others in their area helping with  
their hour. (Please note ONE HOUR). At the end of their hour the main ncs

for that region will contact the next regions ncs and turn ncs over to them  
etc.  
etc. etc.

Each ncs will start at 08:00pm in their time zone.

Starting at 8:00pm EST (01:00 UTC) East coast ncs will start the net  
At 02:00 UTC East coast ncs will turn ncs to Midwest ncs  
At 03:00 UTC Midwest ncs will turn ncs to Mountain ncs  
At 04:00 UTC Mountain ncs will turn ncs to West coast ncs

comments please to wa9vrh@ocslink.com

Have fun and enjoy the great sounding AM signals. 73's Larry WA9VRH

I purchased this Johnson 500 several years ago, and just haven't had the time or space to do anything with it, so it's up for sale. I have enough other Boatanchors to last me well into my retirement. I'll deliver it or meet someone within 100 miles, but I will not ship it.

The front panel and cabinet are in great shape, and everything looks to be original, except for some of the electrolytics. It's a beauty. No nicks outside, and very clean inside.

I powered it up on cw into a dummy load at about 400 watts input. The final seems a little soft, so I'll throw in an extra 4-400A. I'll also include a manual (copy) and some spare 6B4G's. I'd recommend thoroughly going through the unit before seriously using it. It hasn't been on the air in many years, so I won't provide a warranty. But I will demo what I've done if you pick it up. You also probably want to replace the old connecting cables, as they're pretty long in the tooth.

\$1200 firm.
